

Labor Modeling

Develop a Labor Model Tailored to Your Business

You did not engineer your labor standards to leave them sitting on the shelf. You want to put them to work to inform budgeting and scheduling, and to manage labor costs – your largest controllable expense. To accomplish this objective, you need a labor model aligned to your organizational structure and configured to apply your standards to a given forecast so the time required to perform the work can be calculated by department, by job, by task and by operation.

Logile’s Labor Modeling solution allows you to confidently and more accurately handle the complexities of labor planning across all your stores and markets. Place labor more precisely to drive payroll efficiency, enhance customer service and futureproof your business with superior analytics. Seamlessly link with scheduling and budgeting to reflect and quickly adapt to changing requirements.

Key Capabilities:

- **Standards Analyzer:** Take advantage of the only marketplace solution that performs what-if simulation analysis to evaluate the impacts of proposed changes to business processes and staffing requirements.
- **UPC Analyzer:** Use one-of-a-kind technology to report on the amount of labor any individual UPC drives, helping to inform item-level profitability decisions.

- **Store Clustering:** Easily establish unique store groupings to enhance management of specific labor attributes or perform more precise reporting, significantly reducing time and effort to maintain your labor model.
- **Effective Dating:** Place labor on the right day, week or season to create a more accurate labor plan, then automatically apply those hours to scheduling and budgeting exactly when needed.

**Improve labor efficiency
by 10-15%**

Take Control of Your Labor Costs

Logile offers the only labor modeling solution that empowers retailers to take control of their cost of labor. Leverage labor standards that help you understand true work content and time required to perform activities. Then create objective, accurate labor plans modeled with your specific workplace characteristics and work volume. Easily manage labor standard changes with effective dating.

Key Benefits:

At Logile, we combine retail expertise, industrial engineering, and technological innovation to solve retail's toughest challenges. Our team's human intelligence, coupled with AI and machine learning technologies, sets us apart. Our unified store solutions enable retailers to seamlessly plan, schedule and execute operational strategies.

As part of Logile's Plan suite, our Labor Modeling solution offers the following benefits:

- **Drive Better Labor Placement:** Distribute labor when and where it's needed to mitigate employee frustration and support better customer service.
- **Reduce Labor Modeling Management Time:** Spend significantly less effort creating and maintaining labor models, redirecting time to focus on more value-driven strategies and tasks.
- **Gain Unparalleled Operational Transparency:** Get real-time visibility into labor across the organization to help store leaders drive performance.

Logile is transforming retail with cutting-edge technologies that unite stores and associates. This helps reduce labor and inventory costs, boost

associate satisfaction, and enhance the overall customer experience.

Ready for a next-level customer experience?

Share your challenge with us, and let Logile provide a tailored solution to meet your needs.
