Our solutions enable retailers worldwide to:

- Understand true labor costs and impacts
- Improve employee and operational efficiency
- Boost profitability and retention
- Address current and future regulatory compliance
- Enhance the shopping experience for millions of consumers every day

Our Solutions

Enterprise Standards Manager and Labor Model

We help you build and maintain engineered labor standards, and our labor modeling and analytics deliver visibility into your true work requirements and costs. Profitably drive comprehensive labor planning and execution management with confidence.

Forecasting and Staff Planning

Our AI-driven, machine-learning unified forecasting solution boasts 95% accuracy, the best in industry. Benefit from continuous reforecasting and forecast granularity at the 15-minute, task level. Staff planning has never been so easy; derive accurate staffing by 15-minute intervals—by labor task—to plan labor when you need it.

Staffing Analysis

Understand your cost of labor and service commitments with critical insights to manage staffing parameters and optimally place your labor hours.

Sales and Labor Planning

Our solution leverages data from Logile's enterprise labor model to produce an objective and accurate bottom-up daily and weekly labor budget for the next week, next quarter or next financial year.

Employee Scheduling

Schedule the right associate for the right labor task at the right time to provide the best service. "Wall-to-wall" cross-scheduling generates the most effective schedule by utilizing associates across departments. Automate scheduling to the 15-minute level with metrics-backed performance; no edits required. Supports gig scheduling for utmost flexibility.

Employee Self-Service

Motivate today's digitally driven workforce with mobile 24/7 self-service via Logile Connect for iOS and Android. Associates can swap and bid on shifts, change availability and more. Managers get real-time visibility and also benefit from our Labor Wizard and Lychee, the world's only WFM virtual assistant.

Time and Attendance

Accurately configure and manage complex pay, attendance, benefit and time-keeping rules, governmental regulations, and your business-defined policies. Dynamically process all time entries and edits in real time across your organization to control costs and ensure compliance. Protect your customers, associates and premises with our uniquely configurable health and temperature scanner.

Task Execution and Communication Management

Providing consistent structure, methodology and process reduces employee confusion and distraction. Execute strategic initiatives with task and communication solutions that ensure your associates know what is expected while giving your managers an easy-to-use tool to monitor task compliance.

Performance Dashboards

Our KPI dashboards deliver the visual, real-time operational insight store managers need on their mobile devices to keep them out on the store floor while proactively protecting performance.

Food Safety

We go beyond temp checks and logs and provide you with smart wireless temperature sensors and unique solution-driven guidance to keep your customers safe and protect your brand. Our solution helps with Hazard Analysis and Critical Control Points (HACCP) program automation, training, utilization, measurement, reporting and compliance.

Inventory Management

Optimally plan and manage store inventory with a complete, seamless inventory management ecosystem focused on the store, from configuration and training, to stock management, to ordering and fulfillment. Powered by Logile's unified forecasting accuracy, our IMS spans perpetual inventory, computer assisted ordering, fresh item management, production planning and recipe management.

Retail Services

We set you up for success to achieve organizational change and transformation. From industrial engineering, implementation, integration, training and labor support, we jumpstart your operational excellence journey and accelerate your evolution from Day One—and for the long haul.

Our Services

Rapid Opportunity Assessment

Our team of retail industrial engineers will assist you in discovering quick wins to improve employee utilization, process efficiency, queuing and customer service times. We also help you build a long-term labor optimization roadmap.

5S Workplace Optimization

Success starts with optimizing the workplace. It sets the foundation for creating a consistent operating environment which improves work method efficiency, promotes better customer service and reduces liability. Our team assists you in implementing workplace design principles and creating a rollout strategy that is right for your business—complete with training and change management support.

Efficient Work Methods and Industry Best Practices

We bring modern industrial engineering techniques and cutting-edge industry knowledge to improve all aspects of store operations, from work methods to performance management. We work with you to target the most impactful areas for your business and provide expertise for process analysis, training, change management, pilot and rollout strategy. The result is a more optimized, consistent operating environment.

Engineered Labor Standards

Engineered standards define the time it should take an average trained worker, working at average pace under expected operating conditions, to complete a task. These standards form the basis of applying an earned hours approach to allocating the right store-specific labor. We'll work with you to implement engineered standards or help you validate and improve your existing standards.

Workforce Management Academy

We created the Logile Workforce Management Academy to deliver a solid understanding of key concepts any labor management program and any labor management system should embrace. Your team will learn how to navigate common organizational challenges with industry best practices and lessons learned that our labor experts have acquired through decades of successful retail labor management experience.

LOGILE The Logic of Retail

Logile is the leading retail labor planning, workforce management, inventory management and store execution provider. Our proven AI, machine-learning technology and industrial engineering help retailers worldwide achieve operational excellence and provide the best service and products at the optimal cost. Gain the Advantage with The Logic of Labor. Beyond workforce management—complete store planning and execution solutions.
